Experience

Smartphone Technical Service Technician

• Bursa, Turkey
11/2017 - 12/2019

- Hardware repairs at screen, battery, charging port, and motherboard level for various brands (Android & iOS).
- Software installation (flashing), system updates, and resolving software locks.
- Periodic maintenance of devices and producing technical solutions according to customer requests.

Computer and Laptop Hardware & Software Technician

• Bursa, Turkey
01/2020 - 05/2022

- Detection, repair, and part replacement of hardware faults in desktop and laptop computers.
- Installation of Windows and Linux operating systems, driver updates, and resolution of software issues.
- Hardware upgrades for performance improvement (SSD installation, RAM replacement) and system optimization.
- BIOS/UEFI configuration and data recovery operations.

Quiz App - Flutter

07/2025

- Developed a stylish and user-friendly quiz application using the Flutter framework.
- Designed multiple-choice questions, automatic calculation of 10 points for each correct answer, and a dynamic result screen.
- Implemented a navigation and state management structure that enables users to reset and retry the test.

Movie Recommendation System

07/2025

- Developed a content-based movie recommendation system with a modern interface using Python and CustomTkinter.
- Built a structure that provides more than 30 similar movie recommendations according to user preferences using TF-IDF and Cosine Similarity algorithms.
- Managed data processing processes with Pandas and Sklearn libraries; added autocomplete and approximate matching features for movie titles with difflib.
